CSS

JS

Python

SQL Server

Data Analysis

## Profile

I'm a forward-thinking developer creating immersive digital experiences that blend cutting-edge technology with stunning design. My work exists at the intersection of innovation and aesthetics.

## Education

### Secondary education stage

Al-Wardian Military Secondary School for Boys  
| Alexandria, Egypt

September 2019 – June 2023

I graduated from high school with a very good grade of 84.5 % in the mathematics department, and through it I was able to enter the university of my dreams.

### University education stage

Faculty of Computer and Data Science -  
Alexandria University | Alexandria, Egypt

October 2023 – June 2027

## Experience

**My passion for learning web development** began in **2023** when I had the idea of creating an educational website called **Chameleon**, which aims to develop the university's educational system.

Because of this **site** and my **widespread** fame within the college, this was the reason for my shine as a full-stack web developer, and I was able to join a team to develop the site to be advanced and keep pace with the foundations of systematic learning at the university.
